

Decommissioning Support Specialists

Brimmond Group is an engineering organisation delivering integrated solutions for any hydraulic, pneumatic, mechanical or electrical needs covering a wide range of decommissioning activities and work scopes .

EXTENSIVE RENTAL FLEET INCLUDING :

- Hydraulic control systems for DWS, Subsea Tooling & Umbilical Deployment
- Centrifugal & Submersible Pump Packages
- Flushing & Filtration Equipment

MANUFACTURE OF STANDARD & BESPOKE EQUIPMENT INCLUDING :

- Dual Drum Umbilical Reelers
- Diesel & Electric Hydraulic Power Units
- Attic Oil Recovery Systems

MODULAR CRANE PACKAGES TO ASSIST WITH :

- Well P&A
- Mattress Recovery

MAINTENANCE & RERFUBISHMENT SERVICES

- Purpose built facilities to handle a wide range of work scopes & equipment

Decommissioning Projects

Temporary Crane Solution for Well P&A Operations

- Installed as a temporary lifting solution on both Dunlin and Brent Charlie platforms to support wellhead operations. Reduced previous project downtime due to the old platform crane reliability.
- 1 x EFFER 175000 6SL Zone 2 marine crane (21.47m outreach + Remote), 2 x 45kW Zone 1 EHPU's, workshop container c/w all appropriate tooling, Brimmond Stage 2 Offshore Crane Operator
- Supplied in modules within platform lifting capacity & fully assembled by Brimmond Offshore Technicians

Seawater Lift Pump Package on SNS Decom Project

- Hydraulic pump package supplied for the Hewett platform to support our clients limited footprint and restricted platform locations, common on ageing offshore platforms.
- This approach allows operations to be the plug and play approach with little to no services or interfacing with the asset.
- Picture shows equipment used 80kW DHPU, 3" submersible pump, Hose reeler c/w umbilical, top side control panel, filter skid & hose chute.

Dual Drum Umbilical Reeler for Decom Applications

- Zone 2 Dual Drum Umbilical Reeler built for subsea tooling deployment
- Designed & manufactured to client specification, including level wind for each drum
- More simplistic design for offshore operator allowing operations to be more accurate with the use of the dual drum.
- Improved platform deck footprint into one unit as apposed to two

Modular Crane System assisting mattress recovery project

- Installed as a temporary lifting solution onboard vessel to stack concrete mattresses more safely on deck and allow the vessel large crane to focus on the mattress removal from the seabed.
- Recovered mattresses were stacked straighter, higher and safer together which allowed for easier faster removal at port and saved additional port calls
- 1 x EFFER 175000 6SL marine crane with 21.47m outreach + Remote, 1 x EHPU, 2x Brimmond Stage 2 Offshore Crane Operators

Contact us for full details on our wide range of services which includes:

DESIGN - MANUFACTURE - RENTAL - SERVICE - REPAIR - TESTING

Services & Equipment

Rental Equipment

- Safe Area & ATEX Diesel & Electric HPU's 20kW-400kW
- Spooling Winches & Reelers
- Pump Spreads including centrifugal & submersible
- Marine Cranes and Lifting equipment
- Decommissioning & subsea project related equipment

Design & Manufacture

- Hydraulic, pneumatic & electrical equipment
- Subsea & ROV support packages
- Well abandonment equipment
- IWOCs spreads
- Pressure test equipment

Refurbishment, Service & Testing

- Full strip repair & modification
- Purpose built test bay facility for winches & cranes
- Back tension spooling services
- Load test up to 1000 tonnes
- Pressure testing

Marine Cranes

- Major supplier of marine & offshore cranes
- Onsite service, inspection, repairs & maintenance
- New & second hand cranes kept in stock
- OEM spares in stock including winches & remote control
- Onsite & offshore technicians, crane operators and
